

Coding Standard

Team Name: Scribblers

Naming:

Classes are CamelCase with the first letter capitalized

Variables are camelCase with the first letter not capitalized

Functions are CamelCase with the first letter capitalized except when overriding

lowercase functions

Constants (public static final) are all uppercase with underscores for spaces between words

File names are CamelCase with the first letter capitalized

Curly Brackets:

Curly brackets are put on the same line as the if, else, while, for, function, or class declaration / definition line, for example:

```
public void Update() {  
    // ...  
}
```

Spacing:

Tabs are 4 spaces

One empty line between each function

Variables in a class are at the top, functions at the bottom

One empty line between variables and functions
